

New for 2020—Mangave®

Mangave® is a new series that is a cross between the Manfreda and Agave. These rare hybrids combine the best of both varieties, they have better growth rate and the interesting patterns of Manfreda, and the habit of Agave. These varieties finish more quickly than Agave with the Manfreda parentage.

Raker Roberta's will have limited availability of these 4 varieties ready to ship weeks 7-10 of 2020 in our 36 strip tray size.
